

JOB TITLE:

Salesforce Developer

POSITION TYPE:
Full Time / Contract

LOCATION:
Remote with 40% travel

SUMMARY / OBJECTIVE

As a Salesforce Developer at YDC™, your primary focus will be custom Salesforce development and integration with other services. You will collaborate with stakeholders to design, test, document, and implement new applications as well as enhance and maintain existing ones.

At YDC™ you are required to have superior communication and writing skills, technical problem-solving skills, and a customer orientation such that you can handle any issue that arises. You will advise and guide customers, helping them through their journey alone or with a team on several different engagements at once. You can understand complex technical and business concepts and explain them in a straightforward manner to others.

Your ultimate mission is to deliver a first-rate client experience and positive brand awareness for YDC™.

Working independently, or as part of a team, you will have the opportunity to work at the front end in a rapidly growing business.

DUTIES AND RESPONSIBILITIES

Essential Functions:

- Develop, enhance, debug, support, analyze, maintain and test new/existing functionality
- Perform custom development using Lightning, Apex, SOQL, JavaScript, CSS, APIs, Visualforce and other web technologies/ languages
- Manage integrations with other systems
- Perform Release Management and Deployment activities
- Work with development team / product owner to identify system enhancements and/or new applications to meet business needs.
- Contribute to all technical aspects of projects under development
- Perform detailed analysis of business and technical requirements
- Write technical approach and design documentation supporting business needs
- Create development and integration plans
- Take ownership of escalated or complex issues or problems and follow through to resolution
- Participate in all phases of the software development lifecycle, including discovery, analysis, requirements definition, solution design, configuration, code development, testing, deployment and support
- Work independently to make decisions regarding resolution of issues

POSITION REQUIREMENTS

- Hands on Salesforce Lightning Development experience (out of the box and custom)
- JavaScript Work experience in Web services SOAP and REST APIs
- Hands on and very good knowledge of SOQL & SOSL
- Hands on Salesforce batching and scheduled jobs in lightning
- Hands on Apex code in lightning (Out of the box and custom Apex code)
- Hands on workflows (Approval Process, Flow Builder and Process Builder) in lightning
- VS Code is good to have experience of things outside Salesforce primarily integration using REST
- API Knowledge of other off platforms like JavaScript, React or Node JS, AWS would be advantageous
